

SPECTROWAX STONE CARE PRODUCTS

NOW IMPREGNATOR

DESCRIPTION:

NOW IMPREGNATOR is a special blend of silicone and polytetrafluoroethylene, water-based, subsurface impregnator that:

- ⇒ Rapidly penetrates into the pores of marble, granite, limestone, terrazzo, ceramic, porcelain, slate and many other natural and man-made stone surfaces.
- ⇒ After drying, forms an impregnable barrier against water and oil and water and oil based soils.
- ⇒ Can be used on polished, honed and flame-cut surfaces.
- ⇒ Can also be used as a grout sealer/protector
- ⇒ Will cause minimal color change when used
- ⇒ Is easy to use

USES:

For protection against water, oil, water-based and oil-based soils penetrating most natural and man-made stone surfaces.

DIRECTIONS:

1. The area being impregnated must be clean and totally dry for at least 8 hours.
2. Apply a thin film of NOW IMPREGNATOR with a sprayer, clean, lint-free cloth, or roller.
3. Allow to penetrate for 10 to 15 minutes.
4. Remove excess material with a clean, dry cloth or with a cloth that has been wet with water and wrung out well.
5. If total penetration occurs within 10

minutes, apply a second coat as above.

COVERAGE:

100 to 300 square feet per liter depending upon the porosity of the stone being treated.

Available in 12x1liter/cs and 4x4liter/cs.

CAUTIONS:

KEEP OUT OF THE REACH OF
CHILDREN

Wear gloves and eye protection when using this product

EMERGENCY ACTIONS:

If eye is contacted, flush thoroughly with water for 15 minutes. If irritation persists, seek medical assistance.

If ingested, do not induce vomiting and seek medical assistance immediately!!
